

On Monday 6th Nov 2017, CIT students from 1st Year Structural Engineering and 1st Year Engineering Common Entry attended Arup Consultant Engineers offices in Cork City. The visit was organised by Dr. Niamh Power and facilitated by Yvonne Dunphy. The Arup visit had two distinct elements to it. The first was a presentation by James Duggan, Associate Director, on current projects Arup are involved with. This was followed by 'speed engineering'. Speed engineering gave students the opportunity to speak to graduates working in a range of different civil and structural engineering disciplines for example structural, road and transports, environmental and construction.

Approximately 80 students benefited from this experience. The students really engaged with this visit and feedback from the students was extremely positive.

CIT would like to extend a special thanks to the Arup for facilitating this visit especially.

- James Duggan
- Yvonne Dunphy
- All the graduates who participated in the event

This visit was sponsored by the Student Engagement Office in Partnership with the Department of Civil, Structural and Environmental Engineering.

This is a *Transitions to CIT* project sponsored by the Student Engagement Office (AnSEO), Office of the Registrar and VP for Academic Affairs in partnership with the Department of Civil, Structural and Environmental Engineering.
